Original Coho-322 279
Released-301 439

Original Chum- 801 324
Released-78 138

*detailed release [@prsalmon.org](https://prsalmon.org)

Our fish releases including headwater releases of Coho were completed in May.

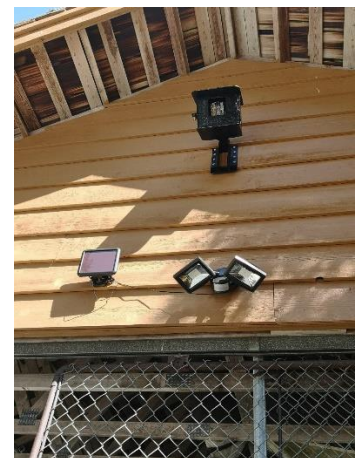

As our hatcheries now sit fallow we are in the process of disinfection and inspection of all rearing and incubation equipment to make sure we are ready for the upcoming production cycle.

Work at the Alex Dobler Salmon Centre is now underway. Gravel from our intakes and water distribution tank has been removed.

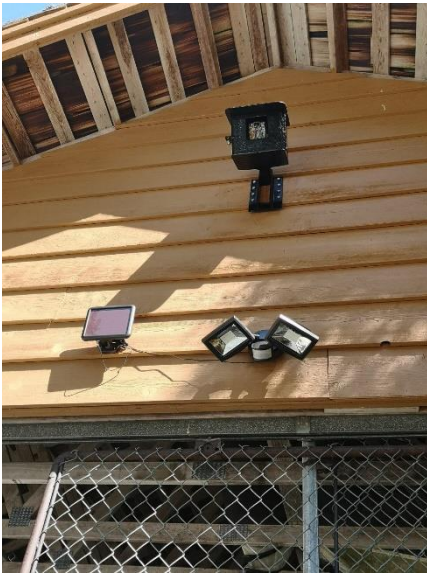

Our Duck Lake Pipeline project will begin in June. We are currently going over details that will include the replacement of our pipelines, valves, intake, and a valve bunker. The project is funded by Brookfield Power.

Our Duck lake Security upgrade project is now complete. Fencing, video cameras, valve

locks, and motion lights are now all in place.

Schools also visited Lang Creek to release fish from the classroom incubator program.

Water Quality data collection continued with biweekly sampling of the Lang Creek Watershed). Routine sampling includes a test for color, pH, turbidity, temperature, salinity flow, and general weather conditions. The information is collected and used to compile an annual report. Full annual reports along with the field data can be
