

Salmon Education.org

Fall Update

The Powell River Salmon Societies new education platform Salmon Education.org is already off to a great start! We've been amazed at how much community and corporate support this program has received. It really shows how much Pacific Salmon are cared for, and how much they need to remain a priority. We've seen the early adoption of this program by classes in both Powell River and Campbell River, and home-schoolers in the area. This Covid proof platform is aiming to take pressure off of teachers with our virtual classroom. We are currently shooting video footage through this brood season to add visual aids to our written materials. Additionally, we are developing more work sheets for teachers and parents to utilize for their students. Our live stream is fully operational and is seeing steady traffic!
